Hi Kristine-

I am transmitting proposed revisions to EPA's RI Section 5.6 (Biota). These files are provided for discussion purposes and to facilitate resolution of Section 5 revisions per the agreed upon informal dispute RI revision process. In general, our proposed changes focus on issues related to technical accuracy and checking that the narrative matches the data products. The majority of text revisions resulted from the updated summary statistics tables per the river reach designations. Like other Section 5 subsections, we first accepted EPA's RL/SO and then provided our RL/SO edits to that text. We can meet at your convenience to discuss these proposed edits once you have had a chance to review them.

Thanks and please let me know if you have any questions.

Sandy
